

Testimonial for Macfield Construction

Peter Bunyan/Krista Bell April 2017

Absolutely delighted we chose Macfield Construction to build our extension/renovation in Kings Road, Subiaco.

After receiving approval from The City of Subiaco in December 2016, we began the process of selecting a builder to construct a major addition to the single storey house, which consisted of demolishing the rear of the house containing the kitchen, dining area, laundry and shower room. This was to be replaced by a significantly larger kitchen, dining area, laundry and powder room on the ground floor with a second floor to be built containing 2 bedrooms both with ensuites.

We requested quotes from several builders and of key importance for us was the ability to have flexibility with the build as we had already identified the bespoke kitchen and bathroom finish that we wanted to achieve. Most of the builders, provided quotes at approximately the same price, without a flexible arrangement. However, Macfield was the only builder who were prepared for the flexibility we were looking for. This included working with us to complete the fit out of the property with tradesmen of our choice, as well as the willingness to be adaptable on the external walls and carport which were part of the project.

As a result we appointed them to undertake the project.

Work started during the 2nd week of July 2016 and straight away we realised we'd made the right decision as their project manager John Niemack was clearly very well organised and already keeping us up to date on progress. The communication continued almost on a daily basis and was extremely prompt to discuss any variations which is key in keeping a project on track and manageable. He also immediately managed any changes we chose to make and had them implemented without any delay. John even kept us informed when we were out of the country over 2 weeks in October by emailing progress a couple of times a week.

Towards the end of the project we had our own suppliers and tradesmen working alongside those of Macfield and thanks to John and his partner Mark Sheffield all of this went to plan and in a coordinated manner.

Barely 6 months after starting the project, we signed off the completion and we were able to move back for Christmas, achieving the time frame that was agreed by both parties back in July. Since moving back into our property we have received overwhelming compliments from friends, neighbours and passer-by's on the fabulous result of the house.
